

Phase 3 Practice Project: Creating Well-Structured .Output for API Clients Using Postman to Get Weather Report.

Write Up:

Description

You are asked to create a well-structured output for their API client using Postman, which will hit that URL and get a detailed report on the weather in a quicker way.

Background of the problem statement:

To get the weather report in a well-structured output, we need to have a set of APIs of the weather application and automatable tool like Postman.

You must use the following:

Postman

Endpoint

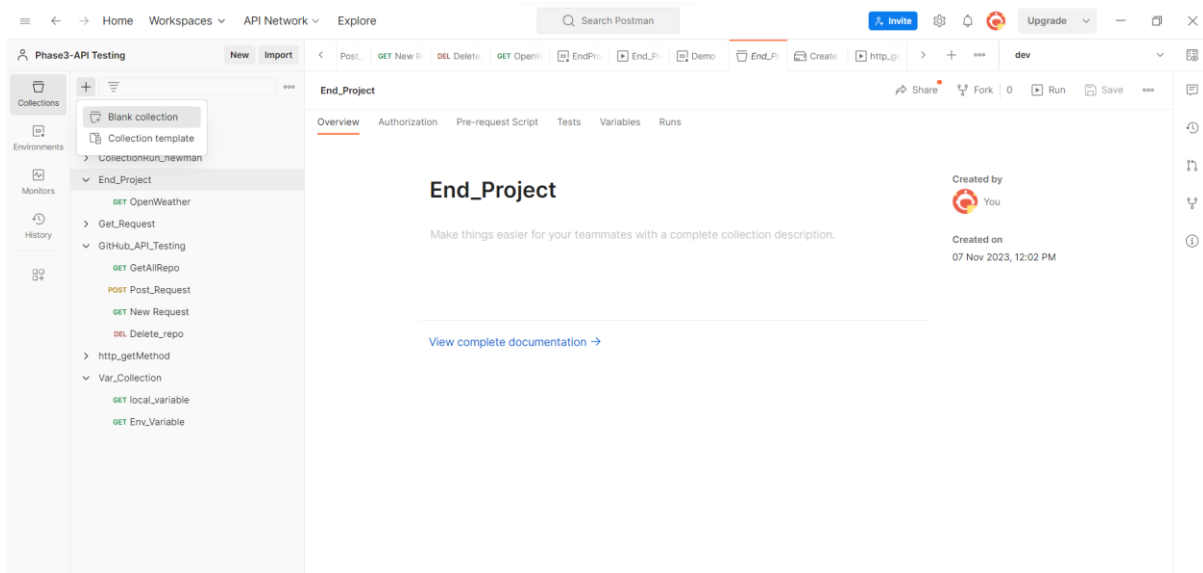

URL(<https://samples.openweathermap.org/data/2.5/weather?q=London,uk&appid=b6907d289e10d714a6e88b30761fae22>)

The following requirements should be met:

- A few of the source codes should be tracked on GitHub repositories. You need to document the tracked files that are ignored during the final push to the GitHub repository.
- The submission of your GitHub repository link is mandatory. In order to track your task, you need to share the link of the repository in the document.
- The step-by-step process involved in completing this task should be documented.

Source code: for practice project

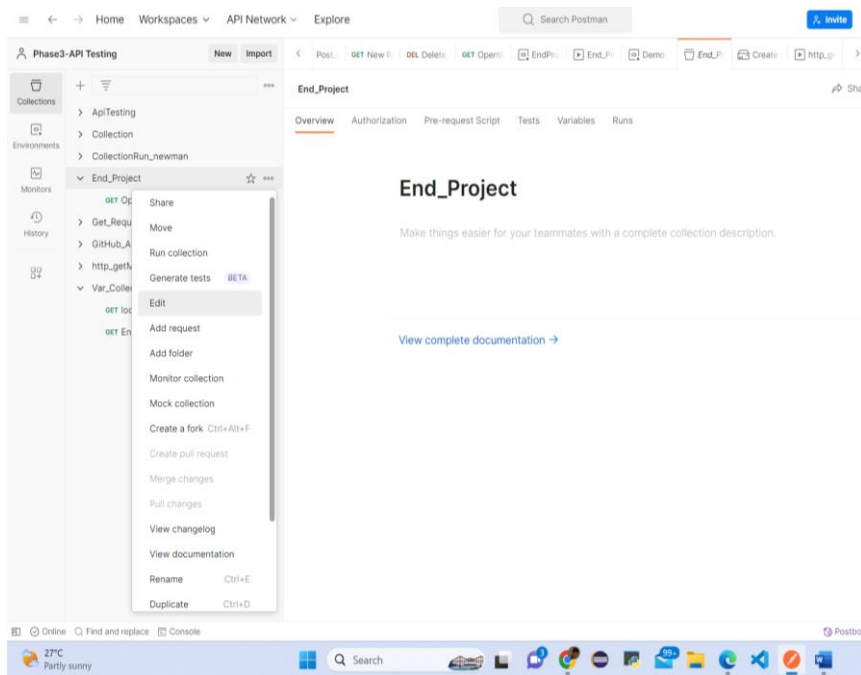

First go to collection area add blank collection

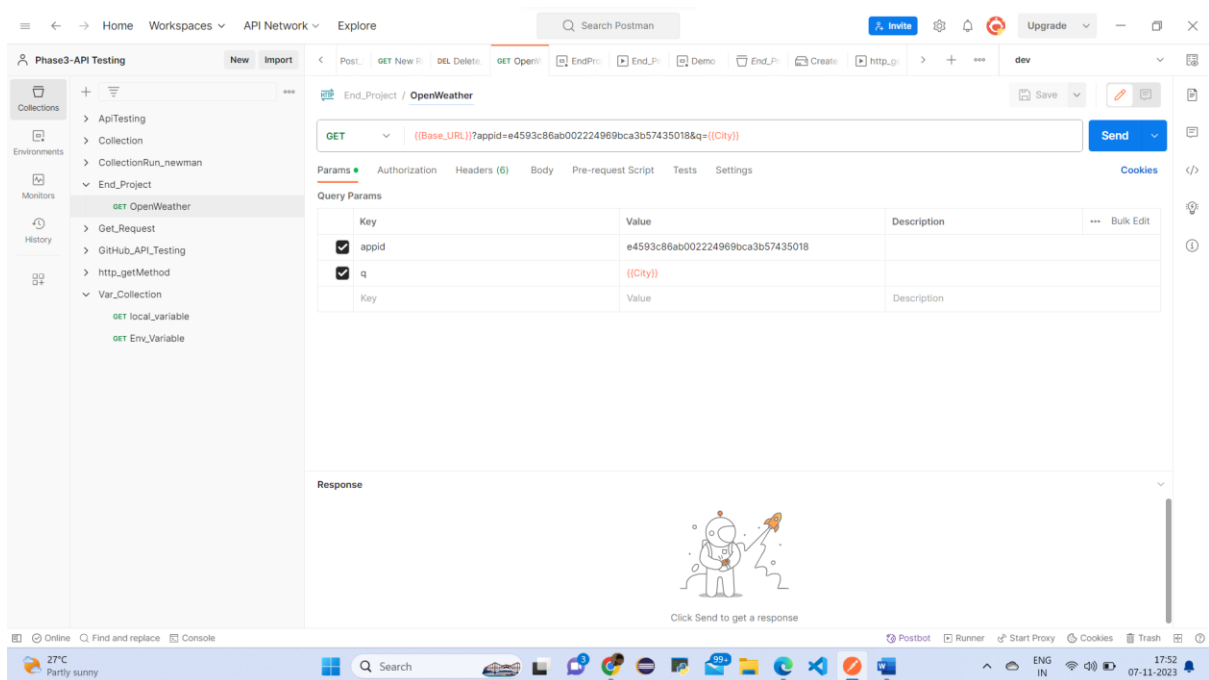

collection and put name as Lesson2- end project successfully lesson2-project are created.

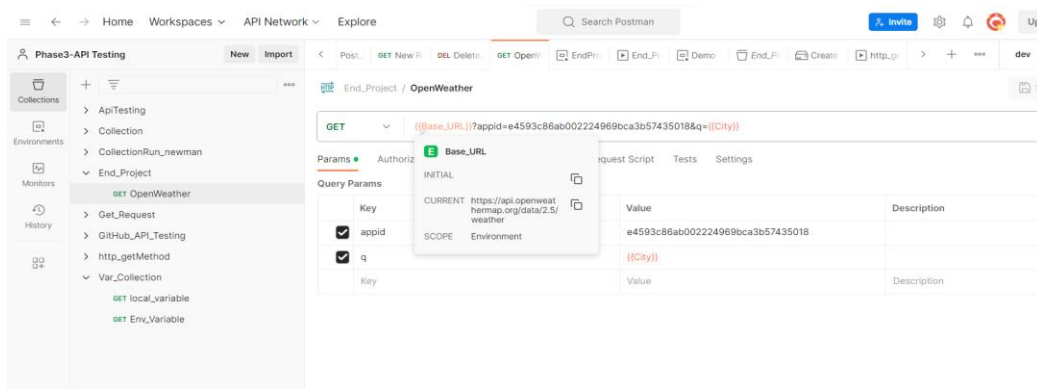

And lesson2-end project have 3 dots click on 3 dots have add request click on add request

And put name as openweather req

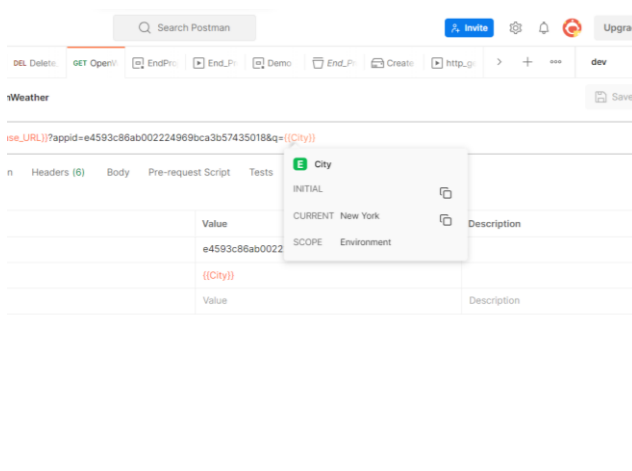

Add request name as openweatherreq in this below part select GET method & put URL `{{Base_URL}}?appid=e4593c86ab002224969bca3b57435018&q={{City}}`

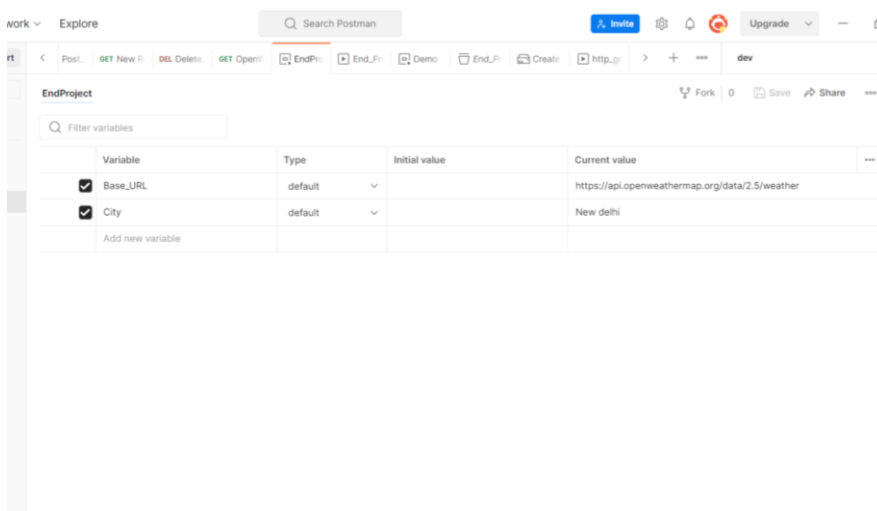

Take {{Base_URL}} is = <https://api.openweathermap.org/data/2.5/weather>

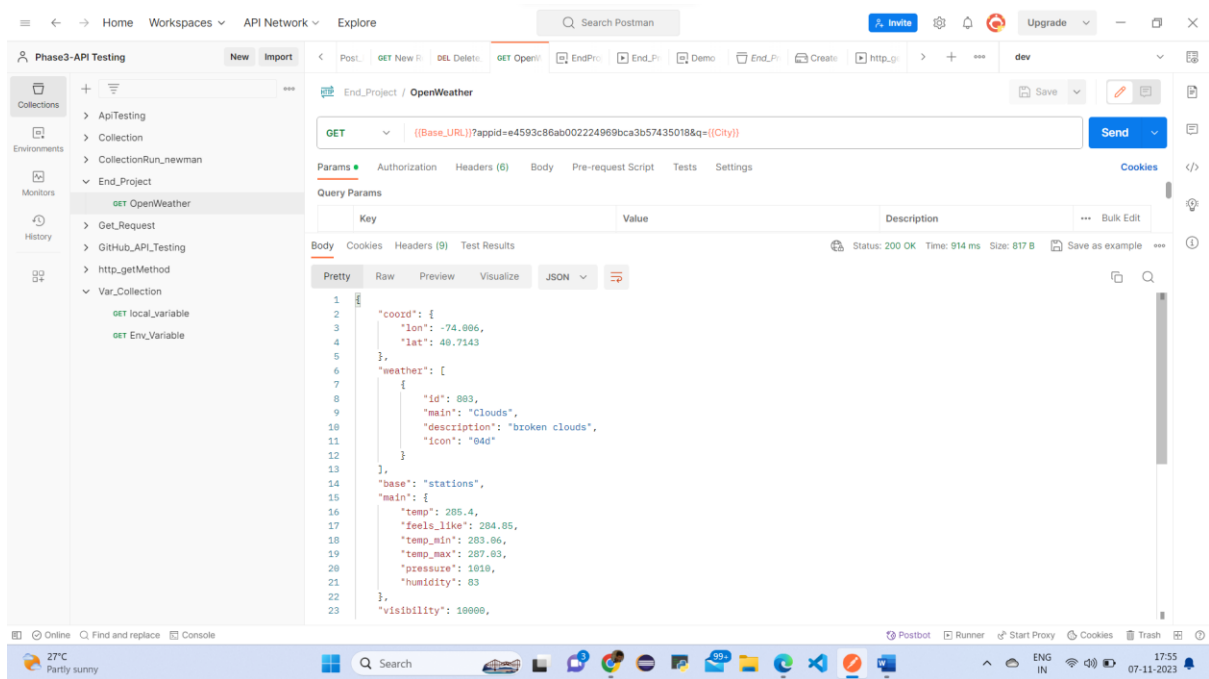

Take {{city}}=New York

And create a environment variable for lesson2 – project put name as project - variables

In this variables put name as Base_URL, city and select project – variables in collection area

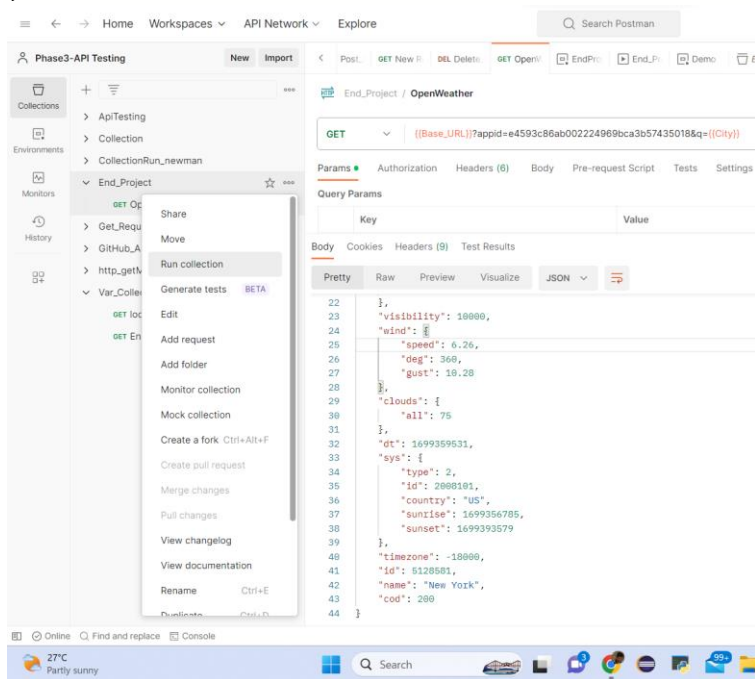

```
{
  "coord": {
    "lon": -74.006,
    "lat": 40.7143
  },
  "weather": [
    {
      "id": 803,
      "main": "Clouds",
      "description": "broken clouds",
      "icon": "04d"
    }
  ],
  "base": "stations",
  "main": {
    "temp": 285.4,
    "feels_like": 284.85,
    "temp_min": 283.06,
    "temp_max": 287.03,
    "pressure": 1010,
    "humidity": 83
  },
  "visibility": 10000,
  "wind": {
    "speed": 6.26,
    "deg": 360,
    "gust": 10.28
  },
  "clouds": {
    "all": 75
  },
  "dt": 1699359531,
}
```

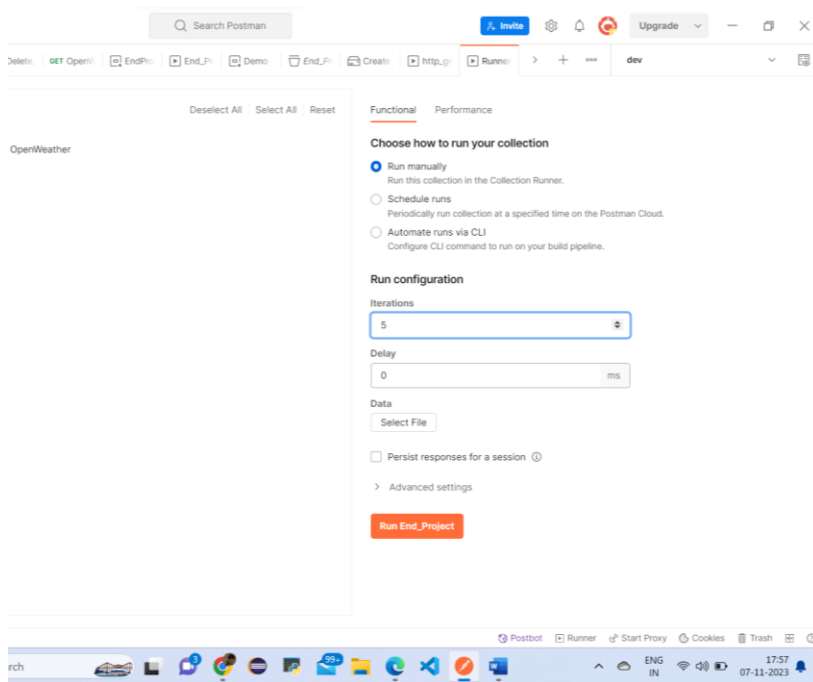

```

"sys": {
  "type": 2,
  "id": 2008101,
  "country": "US",
  "sunrise": 1699356785,
  "sunset": 1699393579
},
"timezone": -18000,
"id": 5128581,
"name": "New York",
"cod": 200
}

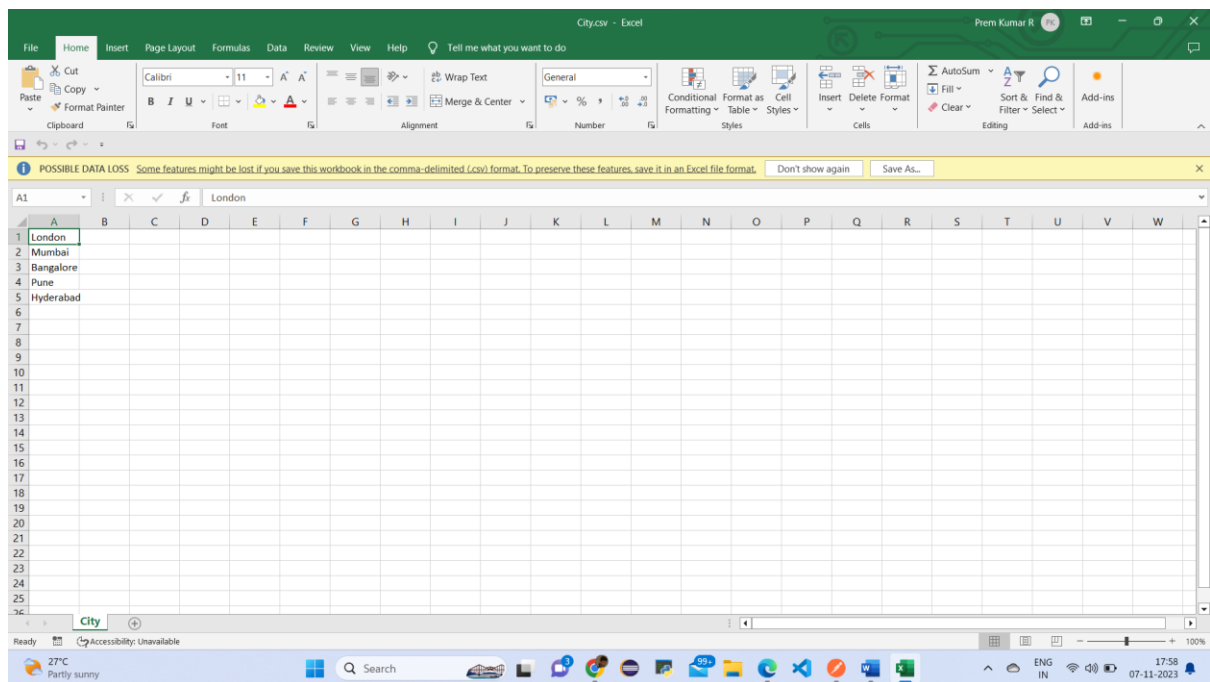

```

Click Lesson2-end project click on 3 dots have run collection

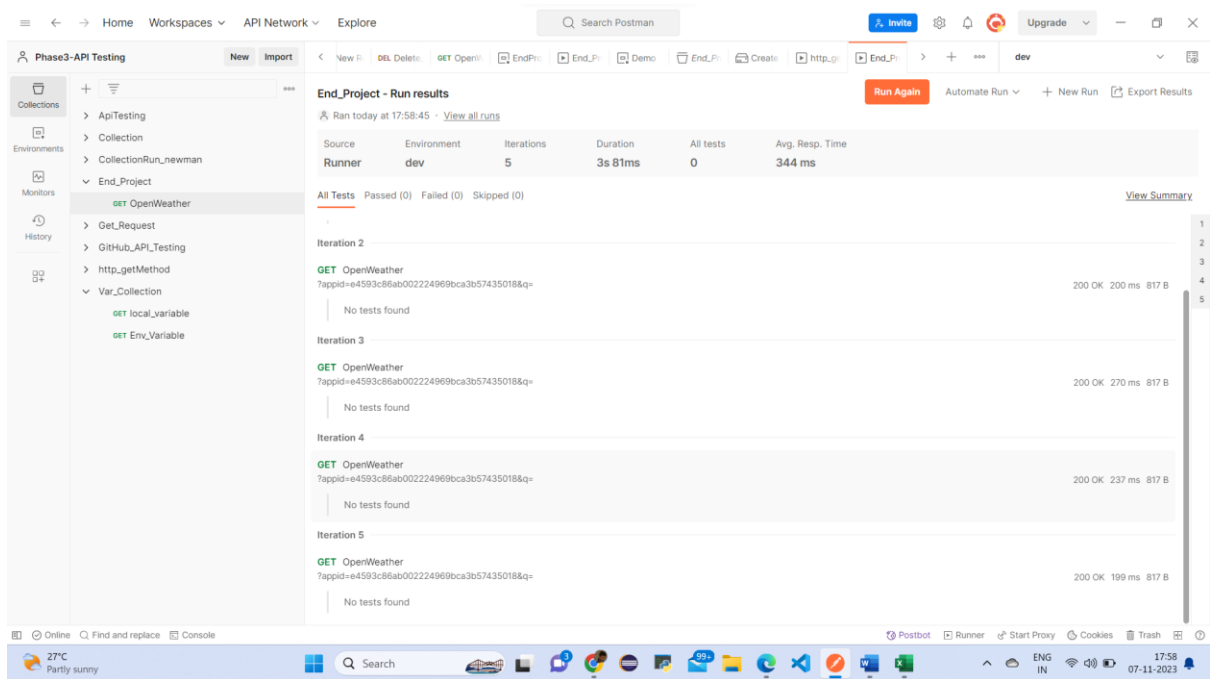

First create one excel and enter 5 cities names

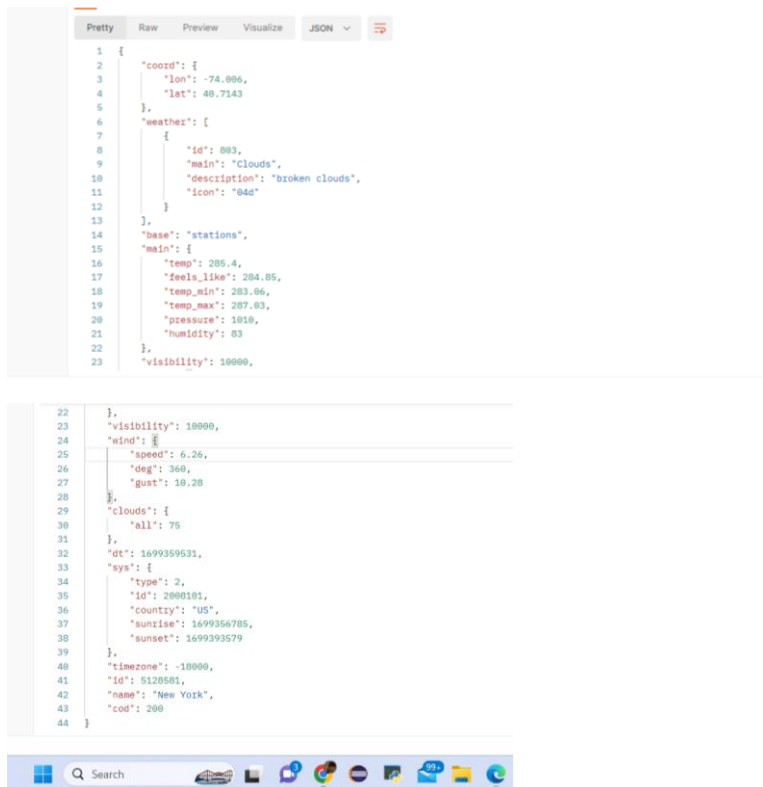

Save this file as cities & and save this excel in csv & delimiter & save as in desktop folder

Run this results

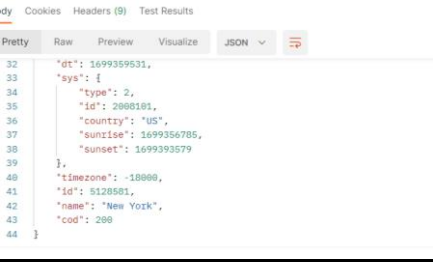

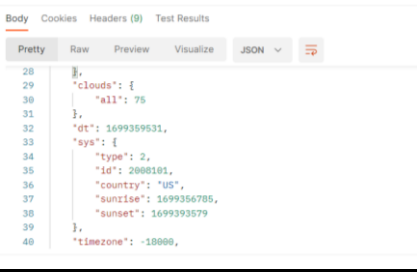

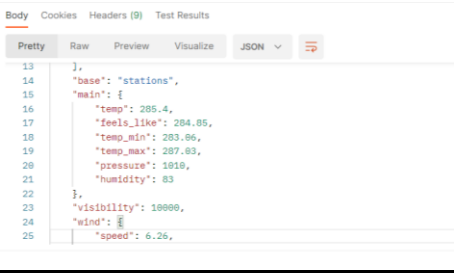

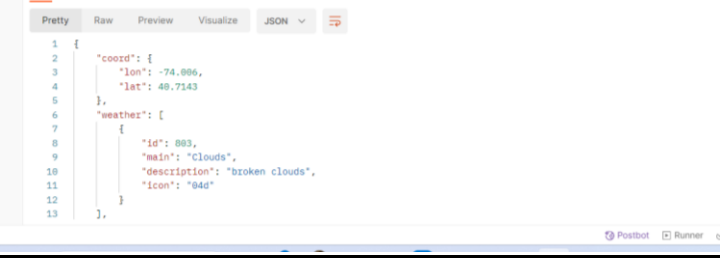

This above picture is summary report

Final output Result is

This is final result output.
